

come and work with us

Delivery Engineer

The Role:

To be responsible for supporting the PDM, PCM & Planner in successful delivery of projects from asset planning to asset operation. To deliver these by complying with Alliance Governance and processes specifically; Project Management, Health & Safety, Commercial, Risk & Value, Budget.

The Anglian Water @one Alliance is a collaborative organisation of consultants and contractors working together to deliver more than half of Anglian Water's capital investment programme. We will design and build around 800 schemes worth approximately £1.2billion between April 2015 and March 2020, known as AMP6 – the current five year investment period, working closely with Anglian Water operations teams and other key stakeholders. We design and construct water and water recycling (waste water) treatment centres that serve more than six million people in the East of England (and Hartlepool Water) and maintain and improve the water mains and the sewerage network in the region.

Key Responsibilities:

Coordinate and manage the contract requirements relating to design solutions, construction and commissioning.

Collaborate with the Technical Manager as per the delivery strategy to ensure excellence in Health and Safety in design.

Ensure the CDMC is advised at the start of design and agree the CDM strategy for the review of PCI, DRA, construction drawings & any other relevant information for the project.

Deliver assigned responsibilities in accordance with Plan for Stage.

Apply sustainability principles; work collaboratively. Find the best solutions to meet the Alliance CR&S targets - sustainability in design & construction, minimisation of the energy use, carbon emissions, waste materials reduction & the supply chain.

Apply production management on all projects. Work with the production managers and site teams to reduce waste and minimise carbon – through materials, time and ways of working. Report all scope changes and ensure that the change control process and technical query process are adhered to.

Ensure effective communication/interfaces with supply chain & IProcT.

Work with the Enabling team to ensure that all relevant enabling activities are undertaken in a timely and cost-effective manner.

Support change control and early warning process.

Maintain stakeholder involvement in key decisions & provide high quality customer service and satisfaction.

Identify and where appropriate manage specific risk & opportunities.

Encourage an environment of continuous improvement. Support the PDM to maintain team energy and focus when work is difficult and results hard to achieve.

Maintain excellent communications with the PDM & Design & Site teams. Recognise and report key issues before they become problems.

Work with the Planner, design & site teams to update the programme as required.

Continuously manage the expectations of the customer to ensure a seamless transition of asset ownership.

Support effective and efficient close out of all projects to meet the clients requirements and enable final accounts completion.

Support the PCM in development and subsequent management of subcontracts.

come and work with us

Provide information as required to the PCM to ensure robust cost management is undertaken.

Support the PCM in ensuring that proper records are kept so that all financial information for audits and cost assurance is readily available.

Provide information to the planner to support creation and maintenance of a single programme to represent all projects, supported by a single source of information for each project.

Key measures & targets:

Supporting delivery of projects

Embedding sustainability principles

Utilising the most cost effective delivery route with the objective of outperforming

Using techniques to minimise the effect on our environment.

Key relationships:

Integrated Project Lead
