Site Engineer

The Role:

The purpose of this role is to provide site engineering duties for a number of projects within the region. The Site Engineer will establish the level and survey control for contracts and set out detailed works as per the contract drawings, ensuring that checks are made on a regular basis. The role will also involve managing and directing ground and archaeological investigation contractors along with other disciplines such as fencing and land drainage.

Key Responsibilities:

Site engineering

- Establish the level and survey control for contracts
- Set out detailed works as per the contract drawings, ensuring checks are carried out on a regular basis
- Ensure that records are accurate and comply with organisational and legal requirements
- Resolve any unexpected technical difficulties and other problems that may arise at any time

Health, safety & environment

- Promote the Barhale Cardinal Rules and establish safe working cultures and practices
- Comply with Company procedures and legal obligations
- Promote and comply with environmental compliance
- Deliver the works safely and to deadline

Quality

- Promote best practice
- Comply with Company procedures
- Ensure work is delivered defect/snag free

Key measures & targets:

- Accurate and timely setting out of the works
- Timely handover of works and quality records without outstanding defects
- Production of accurate records, drawing registers and weekly diaries

Key relationships:

- Site team
- Customer technical representative

Person Specification:

The successful candidate is likely to meet all of the following criteria:

Essential

- Previous experience of setting out on civil engineering projects
- Sound knowledge of construction methods, health and safety, and legal regulations
- Degree/HNC qualified, or equivalent, in civil engineering
- Fully conversant with the use of robotic total station instruments
- Some experience of AutoCAD
