## Technical Manager

### The Role:

The Technical Manager will be part of the @one Alliance partnership based at our client's co-located offices in Peterborough. The Technical Manager will be accountable for the technical resource delivery at programme and project level. They will provide technical support and ensure technical outputs meet the requirements of the Totex Delivery Process as well as meeting project affordability within timescales agreed with the project team. Technical Managers are required primarily in our Wastewater Non-Infrastructure teams, however Clean Water and Infrastructure roles may be available too. The role reports to the Design Manager for technical delivery and the Integrated Project Leader for programme.

### Key Responsibilities:

Plan and deliver all technical aspects of the programme and projects, working with relevant parties to assist in the formation of a design strategy, ensuring that this is adhered to  
Ensure rigorous application of the Risk and Value process and challenge technical solutions to provide best value

Work with the Discipline Head to agree technical resource required, and forecast and manage resource costs throughout the project

Where utilised, ensure external design works are undertaken by suitably qualified and experienced teams

Work with relevant parties to monitor and report on the technical teams progress on all required deliverables

Attend production meetings, and where required chair design meetings

Keep track of all scope changes and ensure that the change control process and technical query process are adhered to and communicated fully on all projects

Take the lead in driving a culture of continuous improvement within the design and wider community

Drive excellence in Health and Safety in design, ensuring a culture of safer by design by eliminating hazards and risks wherever possible, and ensuring the Health and Safety file is completed in a timely manner

Provide clear and concise information about any remaining risks which the construction teams or end user will need to be aware of

Ensure pre-construction information and design risk assessments are completed and are compliant with CDM and the requirements of Anglian Water procedures

Support the Engineering Manager and champion the Benefit by Design business case objectives, ensuring that, wherever possible, designs are driven by Standard Products or Proven Designs

Work with the project teams to reduce waste and minimise carbon

### Key measures and targets:

Adherence to all set deadline and completion of work to agreed standard

Deliver required services (drawings, specifications, estimating packs) on time and to cost/quality standards

Ensure Minimum Asset Standards are adhered to and design criteria of the client applied to the solutions

CDM/health & safety targets by ensuring the pre-construction information is completed and details residual risks and issues
