Estimator (@one Alliance)

A fantastic opportunity for an Estimator to join The Anglian Water @one Alliance. The Anglian Water @One Alliance is a collaborative organisation containing some of the most talented and innovative consultants and contractors in the region.

The wide range of skills and diverse teams encourages creative and innovative thinking, with a focus on high performing team principles. The fully integrated partner structure provides the very best each has to offer to keep the Anglian Water @one Alliance at the forefront of the industry.

The Role:

The postholder will work within an integrated delivery team, and is accountable to the Estimating Manager for the provision of robust estimates and pricing documentation of a project or programme of projects from inception through to start on site.

Key Responsibilities:

Responsible for the preparation of cost estimates which will be collectively reviewed and ratified by the joint delivery team before being submitted for approval via the Totex delivery process.

Develop estimating working practices within the programme area to help ensure a consistent estimating approach including sharing best practice.

Ensure governance of all stakeholders is achieved within agreed timescales.

Ensure stakeholder costs are broken down to an appropriate level at the respective delivery milestones.

Provide high level solution costs for risk and value process evaluation.

Ensure sufficient pricing documentation required for the delivery milestone submissions is in place and delivered on time.

Compile and submit to IProcT initial requisition procurement schedule to identify forward demand.

Ensure that the challenge of sustainability is recognised within the proposed solution including carbon benefits.

Liaise with third parties and stakeholders as appropriate

Responsible for the utilisation and implementation of standard products within the estimating package.

Ensure a handover meeting has taken place with the delivery team to ensure they have a clear understanding of the cost build ups including detailed breakdowns of resources, materials and production outputs provided.

Maintain an awareness of new developments on project processes and propose modifications to any area of the project so that the Alliance makes best use of technological development.

Maintain regular contact with the IProcT to ensure procurement needs are managed.

Identify schemes where specialist capability is required and engage the supply chain early.
