

Quantity Surveyor – Cambridge Relocation Project

The Role:

Here within the @one Alliance we are a totally collaborative organisation made up of seven partner companies and our extended supply chain.

With an ever-growing population and increasing customer expectations across the region, a number of exciting and career enhancing projects are being undertaken to create a forward-thinking, sustainable and industry-leading Water and Water Recycling Service. One of these projects is the Cambridge Relocation Project.

The Cambridge Relocation is a project to build a new Water Recycling Centre (WRC) & Sludge Treatment Centre (STC) for Cambridge such that the land of Anglian Water's existing WRC can be developed to create new housing and Infrastructure in collaboration with key stakeholders. We are responsible for the Design, Construction & Commissioning of a host of activities and require the most enthusiastic and talented team to make this a successful project.

Critical to the success of this exciting project is our ability to practice commercial excellence by ensuring management processes and approaches remain industry- leading to ensure we not only deliver, but outperform against our objectives and customer expectations. With this in mind, we are looking for a talented, enthusiastic and driven Quantity Surveyor to join the team!

What will you be doing as our new Quantity Surveyor?

As our new Quantity Surveyor, you'll act as the commercial conscious to the integrated delivery team, providing commercial support to both the delivery management and on-site delivery teams. Ensuring that that operations are carried out to control costs, maximise value, minimise future liabilities and maintain the required standard of quality and safety, you'll also oversee the full compliance with the Alliance and Anglian Water governance procedures on a consistent basis.

Key Responsibilities:

- Manage all aspects of commercial and cost management of subcontract and design packages as designated by the Project Commercial Manager
- Ensure robust cost management processes are undertaken at all times with accurate and timely reports, data and analysis on hand to assist in commercial decisions
- Ensure that all project team members (including site staff) understand the contractual arrangements, in order to satisfy Client & Partner organisation requirements
- Work in collaboration with the Delivery Team to identify, implement and monitor efficiency plans throughout the lifecycle of a project or programme of projects
- Ensuring that proper records (including final accounts) are kept and maintained so financial information for audits and cost assurance is readily available

come and work with us

Person Specification:

To be considered for this position, you'll have extensive experience in managing costs. Whilst a Degree level (or equivalent) in an engineering/ management/ cost discipline would be beneficial, the passion and desire to pursue a career in Commercial Management is more important.

Showcasing your first-class customer service and leadership skills, you'll have an in depth knowledge of construction and safety and be comfortable challenging processes, practices and norms to improve the overall commercial offering to the business.

Benefits:

As well as offering a competitive salary, remuneration for this role includes flexible benefits, which provides a range of guaranteed benefits including but not limited to:

- 5% Company pension contribution
- Life Assurance at 2 x notional salary
- Single persons private medical cover
- Permanent Health Cover

In addition you may be eligible for entry into the Company's non-contractual bonus scheme, based upon, among other things, the performance of the employee and of the business unit and/or Company.

About Barhale:

Barhale is one of the largest privately owned civil engineering and infrastructure specialists with 40 years' experience working UK-wide across the water, transport, built environment and energy sectors. Founded by our Chairman, Dennis Curran in 1980, the group was originally set up as a specialist tunnelling contractor. Whilst we retain our tunnelling roots, repeated success in several sectors of the construction industry has enabled us to expand our skill set and become one of the largest privately owned infrastructure specialists in the UK.

What we do

We provide design, construction and maintenance services to the following sectors;

- Water
- Transport
- Energy
- Built Environment

We also possess a range of specialist skills to support our civil engineering and infrastructure activities including

- Tunnelling
- MEICA capabilities
- In-house design
- A steel-fabrication and supply subsidiary (BCS Group)
