## Delivery Engineer

### What you will be doing?

Here within the Anglian Water @one Alliance, we are a totally collaborative organisation made up of our seven partner companies (Anglian Water, Balfour Beatty, Barhale, MMB, MWH Treatment, Skanska and SWECO) and our extended supply chain, delivering over half of Anglian Water's capital investment programme.

Now working in the latest Asset Management Period, known as AMP 7, we are working towards delivering an approximate £1.2bn programme of work until 2025. Are you ready to join us as we aim to deliver the most exciting and innovative AMP we have ever seen?

Undertaking circa 800 projects across our vast region requires all our team to collaborate and work towards common objectives to deliver the best service possible to our customers whilst maintaining and enhancing our environment.

To ensure our projects are successfully delivered from asset planning to asset operation, we are looking for an enthusiastic Delivery Engineer who is looking to add value to our ways of working immediately but has desires to develop and grow within an industry-leading alliance!

### What will you be doing as our new Delivery Engineer?

To join us on our journey of project delivery excellence, you'll be responsible for ensuring projects are delivered on time, and safely whilst embedding sustainability principles. Furthermore, you'll drive efficiency and outperformance whilst not compromising governance and delivery processes.

### Key Responsibilities:

- Oversee and ensure projects are on track in terms of time and budget whilst proactively managing risks and opportunities
- Attend the site to gather information and translate into value-added reports and presentations which drive the successful meeting of relevant project Delivery Milestones
- Champion sustainability principles in design and construction specifically around the minimisation of energy use, carbon emissions, waste materials reduction and the supply chain
- Coordinate and manage the contract requirements relating to design solutions, constructions and commissioning and ensure these are always meeting and exceeding Health & Safety standards and legislation
- Provide a proactive and trusted resource to the Project Delivery Manager to support effective and efficient close out of all projects to meet the client's requirements and enable final accounts completion
- Strive to continuously improve project delivery by closely collaborating with internal and external stakeholders to understand challenges and implement solutions

### Person Specification:

To join us as a Delivery Engineer, you'll have experience in delivering projects or coordinating complex tasks and activities to support planned outcomes. With the ability and

# come and work with us

desire to travel across the region as required to support projects, it would be advantageous to possess Construction industry experience with ambitions to develop a career in the field.

With the ability to establish and sustain strong relationships with multiple stakeholders and work in a collaborative and honest fashion, you'll be confident in being proactive and taking accountability to drive performance.

Capable of IT programmes and open to new technology, you'll demonstrate resilience and maintain energy and focus when under pressure.

If the opportunity to join an industry-leading alliance in a role with a defined progression plan appeals to you, please apply today!

## **Benefits:**

As well as offering a competitive salary, remuneration for this role includes flexible benefits, which provide a range of guaranteed benefits including but not limited to:

- 5% Company pension contribution
- Life Assurance at 2 x notional salary
- Single person's private medical cover
- Permanent Health Cover

In addition, you may be eligible for entry into the Company's non-contractual bonus scheme, based upon, among other things, the performance of the employee and the business unit and/or Company.

## **About Barhale:**

Barhale is one of the largest privately-owned civil engineering and infrastructure specialists with 40 years of experience working UK-wide across the water, transport, built environment and energy sectors. Founded by our Chairman, Dennis Curran in 1980, the group was originally set up as a specialist tunnelling contractor. Whilst we retain our tunnelling roots, repeated success in several sectors of the construction industry has enabled us to expand our skillset and become one of the largest privately-owned infrastructure specialists in the UK.

## **What we do**

We provide design, construction and maintenance services to the following sectors.

- Water
- Transport
- Energy
- Built Environment

We also possess a range of specialist skills to support our civil engineering and infrastructure activities including

- Tunnelling
- MEICA capabilities
- In-house design
- A steel-fabrication and supply subsidiary (BCS Group)
