

New Civil Engineer

COMPANIES OF THE YEAR 2018

Dear Kelly Waters,

We are delighted to announce that you are one of the NCE100 Companies of the Year!

The NCE100 power list recognises the most forward-thinking, innovative firms operating in civil engineering today. You are an example of a firm that is driving the industry forward: increasing productivity; driving cultural change; and delivering for society here in the UK and worldwide.

There is much more to the NCE100 than the awards night itself. As an NCE100 Company, you are now part of the exclusive NCE100 Club and can participate in a series of industry best practice sharing events. These take place over the year and provide an intimate setting for networking and encourage you to share best practice for the benefit of the entire industry.

The clubs reflect an eclectic blend of companies such as yourself, that are at the forefront of your profession, pushing boundaries and leading the field.

The 2018/19 clubs will be taking place on the dates below and will cover the 15 categories that form our NCE100 Awards. The topics per club will be confirmed for each date on the completion of the NCE100 Awards 2018.

- 12th July 2018
- 5th September 2018
- 30th November 2018
- 8th March 2019
- 8th May 2019

The NCE100 are the only awards to reward firms that showcase and inspire civil engineering at its best, and by attending the awards night you will be celebrating your achievements of the past year alongside your peers as it's a huge achievement to make to the Top NCE100 companies on the year.

Join our gathering of the great and good on 23rd May, at a new venue for this year, Troxy. For more information on the awards, or to book your table contact Jack Procter on 0203 953 2093 or email jack.procter@emap.com. PLUS with each table booking, up to 5 of your Graduates/Rising Stars are invited (free of charge) to watch the ceremony from a viewing area with full access to the awards after party.

I look forward to celebrating with you on the night and at our NCE100 clubs.

Yours sincerely,

Mark Hansford

Editor, New Civil Engineer
